Dear Mr. Baker,

Thank you for attending a meeting at my house on August 28, 2012 concerning the Kennecott Cornerstone Mine Expansion Project and mine waste pollution around my home. I was pleased with the decision that Kennecott will be inspecting the mine waste collection systems after each future storm event. I feel that this will improve the problems of overflowing sedimentation basins with mine waste.

I am also looking forward to Kennecott's future sampling of the Boyd Dansie property for lead and arsenic levels, which was agreed upon at this meeting. Hopefully, they will find nonhazardous levels on this land.

There are still many concerns for which Kennecott and I don't agree, but I want to thank you and all those who attended, for their time and cooperation in addressing some of the issues of neighboring and adjacent property owners.

Sincerely,
Boyd W. Dansie
